

Problem:

Healthcare systems lack efficient communication channels between patients and medical providers, leading to delays in diagnosis and treatment.

Solution:

We offer a cloud-based platform that facilitates real-time communication between patients and healthcare professionals, streamlining appointment scheduling and remote consultations.

Market:

The telehealth market is estimated to grow from \$80 billion to \$200 billion over the next five years, driven by increasing demand for remote healthcare solutions.

Business Model:

We employ a freemium model, providing basic services for free while offering premium features on a subscription basis for clinics and hospitals.

Financials:

- Projected revenue for the first year: \$2 million.
- Projected revenue for the second year: \$5 million.
- Projected revenue for the third year: \$10 million.
